When Kisses Were Frequent.

It has long been known to ethnologists that among many primitive tribes and races the practice of kissing was unknown. Among the Lapps and the Maoris rubbing of noses occupied its place. The average native of Japan still knows nothing of the practice of kissing.

The practice of lip to lip salutation was especially characteristic of English social life in Tudor times. Its universal employment was one of the things noticed by Erasmus during his sojourn in England and is thus commented on in one of his "Epistolae:" "Here are girls with angels' faces, so kind and obliging that you would prefer them to all your muses. Besides, there is a custom here never to be sufficiently commended. Whenever you come you are received with a kiss by all; when you take your leave, you are dismissed with kisses; you return, kisses are repeated. They come to visit you, kisses again; they leave you, you kiss them all round. Should they meet you anywhere, kisses in abundance. In fine, wherever you move, there is nothing but kisses."

No Time For Fools.

When George Westinghouse, as a young inventor, was trying to interest capitalists in his automatic brake, the device which now plays so important a part in the operation of railroad trains, he wrote a letter to Commodore Cornelius Vanderbilt, president of the New York Central Railroad company, carefully explaining the details of the invention. Very promptly his letter came back to him, indorsed in big, scrawling letters, in the hand of Commodore Vanderbilt, "I have no time to waste on fools."

Afterward, when the Pennsylvania railroad had taken up the automatic brake and it was proving successful, Commodore Vanderbilt sent young Mr. Westinghouse a request to call on him. The inventor returned the letter, indorsed on the bottom as follows: "I have no time to waste on fools."—Success.

Whimsical Criminals.

In the New Zealand Medical Journal appears this story: On walking to the scaffold in solemn procession a criminal once called to the governor of the prison, "Just oblige me, guv'nor, by telling me the day o' the week." "Monday," answered the surprised governor. "Monday!" answered the prisoner in disgusted tones. "Well, this 'ere's a fine way of beginning a week, ain't it?" And he marched on with dissatisfaction imprinted on every line of his face.

On another occasion an officious hangman whispered as he placed the white cap on his victim's head, "If there's anything you'd like to ask me I'll be pleased to answer." The victim craned his neck forward and said in an equally low but very much more anxious voice, "You might tell me, is—is this scaffold safe?"

The Beautiful Isle of Zante.

Zante, the earthquake shaken, the "nemorosa Zacynthus" of Virgil, has been at all times famous as one of the loveliest of islands. It divides with Corfu the distinction of being the richest and most beautiful of the Ionian group, and while the evergreen forest on its eastern shore is the admiration of every traveler the fertility of its vine growing plains has made the little island famous among the markets of the world. The vine is that dwarf variety which grows the currant of commerce. The growing of this vine is the chief industry of the island, but there are also olives in great numbers.—London Times.

Pinto's Scheme.

It was Mr. Streeter, a London jeweler, who was instrumental in exposing the notorious Pinta, who claimed to have discovered the philosopher's stone. His method consisted in having a bag of gold dust concealed up his sleeve, from which, by an ingenious contrivance, he was able to squeeze the powdered metal unnoticed into the crucible. By this means he was able to melt a sovereign and produce three or four times its weight in metal.

A DOG'S TESTIMONY.

It Was In His Own Defense and Was Irresistible.

In one of the Prague district courts recently a foreman named Dastych sued a manufacturer named Weinwert, alleging the latter's dog had bitten him, thereby rendering him for some time unfit for work. The dog was produced in court and the services of a veterinary surgeon were requisitioned as expert evidence. Herr Density, in the presence of the judge, did his utmost to irritate the dog, and even struck it, but all to no purpose. The dog remained calm, and finally, finding the proceeding monotonous, crept under a stool. "Quiet as a lamb!" was the finding of the veterinary surgeon; but "Oh, no," said the foreman, "the dog behaves itself because its master is present." So the dog was taken out into the corridor, among the public, this time unmuzzled, and the veterinary again tried his best to irritate the animal. Doggy wagged his tail, offered first one paw and then the other, and, its advances being rudely repelled by the unfeeling veterinary, ran back into court, sat upon its hind legs before the judge, and begged! Not even the hard heart of a judge could resist this appeal, and the animal left the court without a stain upon its character.

Smoking In Korea.

All men and women in Korea, whatever their age or station, smoke tobacco incessantly. The bowls of their pipes are so small that they only hold a pinch or two of tobacco, and the stems are so long that the smoker is unable to apply a match to his own pipe. The cooly carries his pipe thrust down his neck between his coat and his back; the Korean gentleman carries his in his sleeve.

A Bad Fit.

The Girl—What would you do, doctor, if you saw a man have a bad fit in the street? The Doctor—Advise him to change his tailor.—Yonkers Statesman.

Handicapped.

"He can't tell the truth if he tries." "Oh, yes, he can. But he tells it in such a way that it seems to be a lie."—Exchange.

PERIL IN THE HAND-SHAKE.

Not long ago Dr. J. N. Hirsch, of Chicago, said: "The most delicate perfume upon the hands is not a sign of freedom from germs, and the most refined are not free from disease of lungs or throat, and the germs are rapidly spread by touching the hand that has handled the handkerchief of one afflicted with a cold, catarrh or consumption. The breath one inhales from the lungs of another may contain germs of disease." You will not only be able to resist the germs of consumption, but many thousands of cases have been known where persons who were suffering from incipient phthisis, or the early stages of consumption were absolutely cured by Dr. Pierce's Golden Medical Discovery. It maintains a person's nutrition by enabling him to eat, retain, digest and assimilate food. It overcomes the gastric irritability and symptoms of indigestion, and thus the person is saved from those symptoms of fever, night-sweats, headache, etc., which are so common.

An alterative extract like Dr. Pierce's Golden Medical Discovery, made of roots and herbs, without the use of alcohol, will assist the stomach in assimilating or taking up from the food such elements as are required for the blood, will assist the liver in throwing off the poisons in the system.

Do not permit some designing druggist to insult your intelligence by offering you a remedy which he claims is "just as good"—because he made it up himself, or ten chances to one you will get a medicine made up largely of alcohol, which will only weaken the system.

Dr. Pierce's Golden Medical Discovery is heartly recommended by every person who has ever used it and it has stood the test of thirty-eight years of approval from people all over the United States.

FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of mailing *only*. Send 21 one-cent stamps for the book in paper covers, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE RAILROAD PROJECT TO THE MOUNTAINS.

The talk of a railroad to tap the timber resources 30 miles east of the mineral belt has somewhat subsided, for what reason we are unable to explain. A correspondent of the eastern section writes us that the report is abroad in that region that there is not timber enough to justify the enterprise. Whether by this is meant that the timber area is too limited, or the probable demand for lumber is insufficient to warrant the expense of building the road, we do not know. We presume, however, that the doubt applies to the quantity of standing timber, rather than to the market for the manufactured lumber. Whether this vital point has been definitely decided by competent authority, or whether it is merely vague rumor we cannot say. The average man is hardly able to form a correct opinion on such a question. It takes one well versed in the traffic business to properly gauge the situation. If after a practical survey of the territory, and all the resources that would contribute to the maintenance of a railroad, the conclusion is reached that the resources are insufficient, there would be nothing left to do but to submit, and develop the unquestionable sources of wealth that lie in our upper country in other ways. It may be true that the timber is at present the main source of support for a railroad. It is calculated that the mines of Jackson and Sutter Creek consume from 30,000 to 40,000 timbers per year. The freighting of these logs to the mines even by rail would mean a revenue of between $40,000 and $50,000 yearly, in addition to this the wood for fuel would amount to $15,000, that is assuming that oil would be displaced as fuel at the mines by the introduction of a railroad. Besides this there is the lumber interest, the traffic in shakes, spiling and cord wood, which might safely be relied upon to bring up the aggregate revenue from timber and wood to fully $100,000 per year.

Besides these interests there are many other undeveloped resources in that section, both agricultural and mineral, which would surely grow rapidly under the stimulus of railroad facilities. We are aware that the territory tributary to the proposed railroad would be confined to a narrow stretch of country between the Mokelumne river on the south and the Cosumnes river on the north, and extending to a point 40 miles above the mother lode. Beyond that point the railroad could not hope to command much business from the present outlook. Inasmuch as there is much depending upon this talked-of railroad, it is hoped that the matter will not be allowed to drop until it has been thoroughly sifted. The salvation of a large part of Amador county hangs upon it. Without this stimulus that region is languishing, and will continue to languish. With a railroad it would revive with newness of life.

THE WAR IN THE ORIENT.

The Russo-Japanese war has already had the effect of revising the opinion heretofore held concerning the military prowess of oriental people. At the outset the Japanese established their superiority on the sea. In a few well planned exploits before Port Arthur and Chemelpo the navy of Russia was crippled, the Japs easily asserting their mastery over their Muscovite foes. Russia has never amounted to a formidable sea power. She has boasted of a big navy, but the ability or experience to handle the war vessels and guns has been lacking. The Russians now claim they expected to be worsted on sea. This admission is made after repeated defeats, and when their naval inefficiency has been demonstrated before the world. The truth is they looked with disdain upon the little brown men who had so defiantly thrown down the gauge of battle. The dream of Russia is to become master of the world; to secure ice-free ports not only for her commerce but her navy also, from whence she might assert her might as a marine power. It is true, this overgrown bear of the north has never fought a sea fight of any importance in which she came out victorious. During the Crimean war her war ships were scuttled as they lay at anchor at Sebastopol, to prevent them falling into the hands of the enemy. The same motive that led to the burning of Moscow, impelled the Muscovite sailors to destroy their own vessels rather than risk a battle with the enemy's fleet. And it is more than probable that they will do the same at Port Arthur when the supreme moment arrives. In the brief space of a few weeks the present war in the orient has brought the civilized world face to face with the fact that Japan is a naval power that must hereafter be reckoned with in the administration of the world's affairs. Her sailors are as brave and skillful as those of any nation.

The operations on land in this conflict between the despotism of the west as represented by the Cossack hordes, and the advancement of the east as exemplified by the forces of Japan, have been equally surprising. In every onset the soldiers of Japan have been more than a match for their burly foes. Russian prestige has been humbled in the dust, and the humiliation is more keenly felt for the reason that it has been administered by a nation of pigmies that they were wont to look upon with contempt. While the Russians have been playing at war by carting their sacred images to the war zone as omens of good, and at the same time sending misfit shells and doctored powder for their artillery, and worthless foodstuffs for their soldiers, the Japs, thoroughly equipped in every respect, and ably officered, have driven their antagonists into the heart of Manchuria, and bottled up the Port Arthur garrison of 30,000 men so completely that the fall of that stronghold is inevitable.

For a Hundred Years.

For a hundred years or more Witch Hazel has been recognized as a superior remedy, but it remained for E. C. DeWitt & Co. of Chicago, to discover how to combine the virtues of Witch Hazel with other antiseptics, in the form of a salve. DeWitt's Witch Hazel Salve is the best salve in the world for sores, cuts, burns, bruises and piles. The high standing of this salve has given rise to counterfeits, and the public is advised to look for the name "DeWitt" on the package, and accept no other. Sold by City Pharmacy.

A Strong Heart

is assured by perfect digestion. Indigestion swells the stomach and puffs it up against the heart. This causes shortness of breath, palpitation of the heart and general weakness. Kodol Dyspepsia Cure cures indigestion, relieves the stomach, takes the strain off the heart and restores it to a full performance of its function naturally. Kodol increases the strength by enabling the stomach and digestive organs to digest, assimilate and appropriate to to the blood and tissues all of the food nutriment. Tones the stomach and digestive organs. Sold by City Pharmacy.

Haying.

The hay crop seems to be heavier than for years. Unless we should have an unusually heavy rain and spoil a great portion of that already harvested, hay of all grades ought to sell at a fair price this season.

Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Why Not Celebrate?

What are we to do on the coming 4th of July? Are we to sit idly by and let the day that gave our nation birth pass unnoticed, or shall we as true American citizens show our appreciation of our country's progress and prosperity by celebrating in a manner that will impress upon the minds of the boys and girls of to-day the importance of the national responsibilities that are soon to be placed upon their shoulders. Every county in the state should have a public celebration, and some of them two or more. It makes better citizens of our people to be annually filled with the true spirit of patriotism. There are no factions, no parties, no sect, but all good, true, loyal, law-abiding, liberty-loving people on that day of all days in America. Jackson should celebrate. Her churches, her orders, her societies, her people should all unite, and what a gathering we can have. Who will take the initiative in this matter? What suggestions have you to make? When and where shall our citizens get together and talk this matter over? There is no time to lose. If you desire to celebrate let your wishes be known within the next week. Who will speak first?

LETTER FROM ALASKA.

SKAGWAY, ALASKA, May 10, 1904.

Dear Ledger:—

Since writing last I have been taking a trip full of interest and excitement, to say nothing of danger for that may be met at any time or place. On Jan. 24th I left Rampart in company with the mail carrier. The day was clear and calm, mercury 21° below zero. The mail was on a sled 14 inches wide and 8 feet long, drawn by six dogs. Through the kindness of the Supt. I was allowed to put my bundle on the sled, as the mail up the river is very light, only 80 lbs. this trip; the limit is 400 lbs. The dogs are harnessed tandem, and guided by voice and whip, and in keeping the trail the leading dog shows an intelligence almost human. The mail had arrived from Nome the night previous, and was delivered to our carrier this morning. Our route was up the river, and the trail well trodden. Although I had recently taken trips of 8 to 22 miles to get in training, I did not expect to travel as fast as the dogs, and started two hours in advance. Twelve miles above Rampart I saw through a break in the hills the sun for the first time in sixty-four days. I wore ordinary clothes and a "parka," which is "an overall" denim coat, made like a shirt and put on over the head and reaching below the knees. It has fur cuffs and a fur fringed hood sewed to the collar, which can be drawn over the cap and tied across the nose. Footwear, ordinary socks, then Arctic socks, (a kind of canvas shoe) then a light pair of German socks coming nearly to the knee, a heavy pair over these, and Indian moccasins outside.

The mail carrier was delayed in starting, and did not overtake me until after dark, when I had reached the cabin, 27 miles from Rampart, built a fire and had supper under way, which consisted of bacon and beans, coffee, hot biscuits, butter, and canned fruit. The driver put a square tank holding three gallons on the stove, and filled it with ice from the hammocks on the river. When this melted he put in six fish, size of a mackerel, six cups of rice flour and a quantity of cottolene. After cooking about an hour the mess was poured into six washbasins. The dogs watched intently, but showed no impatience until the word was given, when they sprang for the dishes and devoured the contents, licking up every bit until they looked ready to burst. Then they rested 12 hours and did a hard day's work before being fed again.

The carrier and I each rolled in a fur robe, and slept like little angels on a board mattress. Next morning I could easily locate each of the 600 muscles in my body, but couldn't afford to be left, or delay Uncle Sam's mail. On the evening of the 3d day we reached Fort Hamlin, 78 miles above Rampart, where we met the carries who had arrived from Victor's, 80 miles further on. Next morning each carrier doubled back over his route, having exchanged mails. I continued my journey with a new acquaintance, my soreness all gone, appetite immense, and able to enjoy the novelty of the trip and the wondrous beauty and grandeur of an Arctic winter. The trail follows the river, except a few places where crossing a narrow neck of land cuts off a long detour. Just above Ft. Hamlin we left the hills and entered the Yukon Flats, 240 miles long and 20 to 60 wide. The snow here often drifts over the trail so that snow shoes are necessary to break a way for the dogs. We had to do this six days. One night I lost my way seven miles from camp, having walked slowly instead of keeping up with the sled. The snow had destroyed the trail; it was 30° below zero, and I had no food, blankets or matches, so felt rather "lonely" for a time, but found the trail in about an hour and took care not to lose it again.

The morning I left Fort Yukon, which is a few miles north of the Arctic Circle, I saw Jack Carr, the mail carrier, start with the mail and express for the Koyukuk diggings, 250 miles farther north. He makes 10 trips a year, omitting May and October when the trail is bad.

At Circle City a shortage of many necessaries exist, which will cause discomfort but no actual suffering. No supplies can reach here before July. Last fall low water closed navigation very early, and many steamboats and barges are frozen in between Ft. Yukon and Dawson. The goods will be removed by teams as soon as the insurance companies and custom house officials will release them, but the delays of red tape cause great inconvenience. The boats will probably be crushed when the ice breaks up in the river.

The hardest experience of the trip was facing a blizzard for three hours at 46° below zero. The steam rising from the air holes in the ice along the river on a very cold day resembles a conflagration. The moon in the Arctic regions is in sight about 15 hours each day. I had never heard this fact mentioned.

Above Circle City are wayside hotels called road houses. The prices are high; $1.50 generally for a bed or meal, and the fare as a rule very poor. Our kind (?) government exacts a license of five hundred dollars ($500.00) a year for the privilege of accommodating the people who are developing this Arctic region. This may be a good thing for the treasury, but will not look well in history.

After nineteen days of this sort of travel, averaging 26 miles each day, I reached Eagles, from whence a weekly stage runs to Dawson. As if luck wished to reward me for the hardships of the trip, I was invited to dinner by Mr. Smith, agent of the N. A. T. & T. Co., where I met Mr. Merrin, the mail Supt., the post master and his wife from Dawson, who had come down for an official and social visit, and a mine owner from 70 Mile Creek. The "menu" included oyster soup, crab salad, roast turkey and ice cream, and the comradeship that is characteristic of frontier life shows at its best in a cosy home with a 30 below blizzard outside.

The voting closed at noon yesterday. Miss Flora Giannini captured the prize, with a vote of 3628, the next highest being Miss Birdie Lucot, who received 3046 votes.

New line of ties at the Jackson Shoe Store.

Dr. C. A. Herrick returned home Saturday evening from a week's visit to San Francisco. He expects to leave about the 12th instant for Los Angeles on business concerning the state board of dental examiners, and thereafter expects to proceed to the St. Louis exposition, in company with Mrs. Herrick, to be gone about a month.

Ekel Gets Eighteen Months.

J. J. Ekel of Plymouth appeared before the superior court on Saturday morning for sentence, having been convicted of assault with a deadly weapon upon Ed. Keyes on the night of January 1 last. The court sentenced him to 18 months in the state prison at San Quentin. The maximum imprisonment for the crime is two years. While there is much sympathy expressed for the defendant, owing to his crippled physical condition, at the same time public opinion is fairly agreed that the sentence was not unmerited. Some 20 years ago, during the flush times in Plymouth, when the town had a population of 1500 or more, and was the liveliest camp in the county, Ekel was mixed up in the dance house affray that occurred there. A number of citizens made a midnight raid, armed with shotguns, upon the house of ill-fame on the outskirts of town. Ekel as attorney of the keeper of the bagnio was there when the raid occurred, and in the fusilade of bullets that occurred he was shot in several places. For several days his life trembled in the balance, and his left arm has been rendered almost useless ever since. He has made a living by practicing law, and was subsequent to the dance house affair admitted to practice before the superior court. Quiet and peaceable when sober, but when in liquor he is inclined to be quarrelsome. The shooting for which he has been sent to state prison was the outcome of drink. a game of poker, and the readily drawn weapon as the result of a dispute. Ekel was kept in the county jail for several days after receiving sentence, in order to straighten out his business matters. He was taken to San Quentin by deputy Jackson last Wednesday.

Jackson School Election.

The election for trustees in the Jackson district to-day is awakening more interest than any contest of the kind in many years. A full board of three trustees is to be elected. There are two tickets in the field, and only one of the present trustees is a candidate for re-election, W. E. Kent, who was appointed a year ago to fill the vacancy caused by the death of T. Conlon. The two tickets are as follows: W. Tam, three years, W. E. Kent, two years, E. H. Harrington, 1 year. This ticket is on a non-partizan, non-sectarian, and entirely unpledged. The candidates will act as their best judgment may dictate under the circumstances.

The other ticket is composed of the following: J. R. Huberty, deputy county clerk, is out for the three year term; Geo. Kirkwood for two years, and Chris Marelia for the one year term. Every citizen having the welfare of the school at heart should take a hand in the contest, after fairly weighing the issues involved.

Lost An Eye.

An Italian named Antonio Franco was raking hay in a field on the south fork of Jackson creek yesterday. While so engaged the team ran away, and Franco was thrown from the vehicle in such a way that a tooth of the rake struck him in the left eye, destroying the sight and producing such a wound that the injured optic had to be removed. He was brought to Jackson, to his boarding place at the California hotel. He is a young man, unmarried, and universal sympathy is felt for him in his misfortune.

Foresters Election.

Oro Fino Circle elected the following officers for the ensuing term:

P. C. C.—Tina Schroeder.
C. C.—May Goldsworthy.
Sub. C. C.—Catie Garbarini.
Treas.—Helen Simcich.
Secty.—Carrie Calvin.
R. G.—Lillie Lemin.
L. G.—Florence Head.
I. G.—Sophie Forshey.
O. G.—Mary Turner.
Organist—Alma Mounter.
Physician—Dr. Gall.
Trustee—Rose Ratto.

Decoration Day.

Monday, May 30th, was decoration day, and was observed by all public institutions as a general holiday. In many cities and towns throughout the state appropriate exercises were held, and the graves of the Blue and the Gray were alike beautifully decorated. In Jackson many of our citizens went to the cemetery unostentatiously, and with loving hands and tearful eyes deposited their token of esteem on the graves of our fallen heroes.

Resigned.

Sheriff Norman has resigned as trustee of the Jackson school, owing to the fact that his duties as sheriff demand his entire time and attention. Mr. Norman performed his duties as trustee in a satisfactory manner, and now, before election, resigns that the people may select his successor.

Died in Ione.

The youngest daughter of the late Frank Frates died in Ione on Friday evening of typhoid, and was interred in the Ione cemetery on Monday. Mrs. Frates, at the time of her death, was buried in San Francisco. Loving friends had the remains brought to Ione Monday, and placed beside those of her late husband and daughter.

Memorial Services.

Rev. J. W. Phelps preached an eloquent memorial sermon at the M. E. church last Sunday evening. The church was crowded to the doors. Special music was prepared for the occasion. All the old veterans in town were present.

Examination.

At the dental examination recently held in San Francisco there were 84 applicants, 69 of whom were successful. The state board will hold an examination in Los Angeles about the 12th of the month.

Olives, salami, swiss, limburger Martin's cream and California cheese at Nettles' Mkt.

FROM OUTSIDE PRECINCTS

VOLCANO ITEMS.

Haying is now in full blast. The crop is more than an average. Grillo Bros. are contracting for their year's supply at $15 per ton.

The people are not much excited over the one case of smallpox, as every precaution has been taken to prevent its spread.

Some fifteen of Sutter Creek's young men and several of the gentler sex visited our town Sunday. The men were mostly N. S. G. W's., looking for recruits to the order. Several of our young men have sent in their names, and will endeavor to ride the goat ere long.

Louis Ottinger, of the firm of Knight and Ottinger, was in town during the first of the week, looking after his mining interests in this section.

J. Q. Mason is now one of the happiest men in the Pioneer district. After working all winter trying to uncover a rich vein which he felt positive was near-by, he and his partner concluded to suspend operations for the summer. Mason was not satisfied and went back to put in a few shifts alone. On Friday of last week he put in a blast which opened to view the long-looked-for ledge. He immediately notified his partner of their good fortune.

The two daughters of Captain Glenn, who have been so very ill of typhoid fever, are fast recovering. Four weeks of anxiety has weighed heavily upon the parents.

Bradshaw and Grillo went down to Jackson Sunday to assist in knocking fourteen spots from off the Mokelumne Hill boys.

Landlord Clute of the St. George hotel, has raised $2000 on the price of his property since the Sutter Creek rush Sunday. He is now ready to pungle up to assist in building a railroad to this place. S C RIBBLER.

AMADOR CITY.

AMADOR CITY, June 1.

Wm. Bennetts and wife of Fresno, spent a few days with relatives of this place last week.

Willie Richards, who has been employed on the street cars in San Francisco, is here visiting his parents.

Mr. Swarthout left Tuesday for the east.

Mrs. Tregloan and daughter Dorothy left Wednesday for Oakland.

J. R. Dunlap and wife returned from San Francisco Sunday.

Fidgie Arditto and Will Clifton returned from Frisco Saturday.

Joe Normington and wife of Breton, are here visiting the former's brother.

Mrs. Geo. Wrigglesworth and daughter, Miss Cora, left for Jackson Wednesday.

Mrs. L. White and sister, Miss Burns, went to Sacramento Friday night and returned Sunday.

The home of Mrs. F. Reeves was burned to the ground Sunday morning about 1:30 o'clock.

Mrs. Stout and daughter Mariam of Sacramento, are the guests of Mrs. S. Pearce.

J. A. Bennetts and son Richard departed for Vallejo Monday.

The annual picnic of the M. E. Sunday school was held on Saturday last. Music was furnished by the Ione band, and in the afternoon a ball game took place between the Jacksons and Amadors, the score being 12 to 15 in favor of the Jackson boys. Other amusements were on hand, such as grace hoop, nail driving contest, etc. Everyone enjoyed the affair, and the picnic was an entire success. E LOIS.

PLYMOUTH.

PLYMOUTH, June 1.

As her term of teaching in the Plymouth school has expired, Miss Hattie Hinkson returned last week to her home in Amador City, accompanied by Mrs. L. Burke and George Devore.

A jolly crowd of young people consisting of the Misses Hattie Hinkson, Katie Bunker, Hazel Griffith, Mae Easton, Valla Potter, and Messrs. Fred Ball, George Devore, John Bunker, Carl Thoms and Will Scoble, left here last Thursday for a fishing trip to the Cosumnes river, at a point near Nashville. After fishing for some time they partook of refreshments, and then proceeded to the Nashville mine, where they spent several hours in reconnoitering the mines, arriving home at about 10 o'clock p. m., and reported having had a fine time.

Mrs. Tory, who has been quite sick at a hospital in San Francisco, returned to her home in Shenandoah valley last week, remaining a day with Mrs. L. Clark of this place.

F. A. Ball, principal of the Plymouth school, is confined to his room with rheumatism.

Frank Norris of Oakland, and Miss Maude Brown of Shenandoah valley, were united in marriage by Rev. Call at the bride's residence last Sunday. The groom is well known here, this being his birth place, and resided here many years, while his bride is a popular young school teacher of Amador county, and well respected by all who knew her. They left Monday morning for their future home in Oakland, their carriage being decorated with old shoes which the groom tried to remove on the road between Plymouth and Carbondale, and while attempting it the back wheel of the carriage ran over his foot, bruising it somewhat and causing him to limp. Congratulations.

Mrs. C. Freeman and daughter Kate leave to-morrow for below, where the latter will train for a nurse.

Mr. and Mrs. T. C. Dugan leave to-morrow for San Francisco.

Frank Dennison, who has been in Reno for several months, returned home last Thursday.

Mr. and Mrs. Fred Culbert and daughter Daphne, accompanied by Mrs. Ella Adams and M. Leach, left last Monday for several weeks' outing at the Yosemite valley.

Mrs. D. English and sister, Naomi Thoms, left last week for Santa Monica.

Misses Minnie and Rose Anderson are employed at the Adams House.

Dr. Boyson and wife moved last Saturday into the Wise residence.

Geo. Devore and John Bunker left for Sacramento Monday, the former's home being in that city.

Rev. Call and family, who have been attending conference, returned to this place last week. He was returned as pastor of the F. M. church.

Mrs. A. J. Coster returned from Sacramento on the Carbondale stage last Monday night, where she has been the guest of her daughters, who are employed in that city.

Mr. and Mrs. John Dohman of Placerville, spent Sunday and Monday with friends.

Mrs. Ida Swartz and mother, Mrs. Carrol, left for the former's home in Nevada City this morning.

Miss Mariam Owens, who has been employed at the Nonpareil store in Sacramento, is visiting her mother at this place.

A baseball game was played here last Sunday between New Chicago, Drytown and Plymouth, the score being 26 to 30 in favor of Plymouth.

Memorial services were held in the Christian church Monday, May 30th. The services were conducted by Rev. Phillips. HANS & FRITZ.

BUENA VISTA.

The hay crop this year is much better than last, although the grain crop from appearances will fall a little short. Corn is looking well, and what we lose in one way we are sure to gain in another.

Mr. Tull, the local blacksmith, is just as busy as a bee. He keeps the anvil running until the wee small hours of the night.

Jas. Norris, our merchant and mixologist, also feels the effect of the coming harvest time and retires early, in order to rest his weary limbs for the morrow's work.

James Petty of San Francisco, who for 12 years ran the blacksmith shop here, was shaking hands with his former customers last week.

Miss Frankie Spray of San Francisco, is visiting with Miss Fitzsimmons, at the latter's home across the creek.

The Fitzsimmon Bros. will soon begin operations at their coal mine, in order to supply the demands of their customers in the mountain towns. This coal sells readily at $4 per ton, and makes a cheap fuel at that price. The deepest shaft is now 60 feet, and the longest tunnel 150 feet. The vein is 11 feet wide, and the coal is gradually increasing in quality. ZERO.

Baseball.

In many respects last Sunday's game was one of the most interesting seen in Jackson for a long time. Keen interest by both players and spectators was manifested throughout. There was no time during the game that either side seemed to have a decided advantage. Not a base was secured by either side on balls; one three-base hit was made, and four two-base hits. Several double plays that delighted the spectators were witnessed. We refrain from making individual mention, as all the players did good work considering the practice they have had so early in the season. "Sockey" Arditto was umpire, and it is useless to say that all received a square deal. "Sockey" understands every turn in the game, and places honest baseball at the head of all sports. Following is a complete score of the game:

Caved on and Killed.

Robert Clunich was caved on while working in the stopes of the Melones mine in Calaveras county on Tuesday night of last week. A large quantity of rock fell from eight feet above him, a quantity striking him in the back, fracturing the pelvis bone and injuring him internally. He died the following night. Deceased was 38 years of age, and unmarried. He was a member of the Slavonian Benevolent Society of this county. The remains were brought to Jackson on Friday, and the funeral was conducted on Saturday, the interment being in the cemetery of the Greek Orthodox church.

Married.

Rev. W. Tuson was called to Mokelumne Hill Wednesday to unite in marriage Joseph H. Vieusseux and Miss Gladys G. Burce, both of the Hill. The bride is considered one of the most charming young ladies in Calaveras county, and a great worker in the Episcopal church of her home town. The groom is an estimable young man, well worthy of the prize he has won. An excellent wedding breakfast was partaken of by friends and relatives, after which the couple departed for various points of interest throughout the state.

NOTES FROM GOLD MINES

DEFENDER.

Stir and prosperity seem to prevail at this little camp at the present time. A full crew of men are working in the Defender mine, and the little 10-stamp mill never fails to yield its monthly gold brick. A large body of ore is now in sight at the 300 level, a tunnel is being run south, and on Friday of last week a body of pay ore was encountered 220 feet from the main shaft. Three 8-hour shifts have been put to work sinking. Just how deep they will go at present depends upon the nature of the developments as they go down. Superintendent Joyce seems to have the fullest confidence in all his employes, and they in return show great appreciation for his concern in their personal welfare.

Three ledges have been encountered in this immediate vicinity during the past week. Chas. Hagberg, working in the Belmont extension, opened up a 2-foot ledge of fine looking rock; Messrs. Trackwell, Couch and Trackwell have encountered a fine appearing ledge and will work it extensively, while the find in the Defender goes to make the third.

The Red Tape will start up about the first of June. Three men are now at work making preparations. The mine is owned by a good company, who pay their men promptly each month.

Geo. S. Andrews is preparing to take the water from the Grand Prize shaft, and repair the tunnels. He is not prepared to say at present to what extent he will operate this season. A great deal of very rich rock has been taken from this mine, and it is known to carry much more of the same character.

At the Tom & Dick mine a 140-foot tunnel has been run, with flattering results. This is supposed to be the Defender vein, but being more favorably located the owners look for something big in the future. An old miner who prospected this mine in early days, and who knows its history up to the present time, declares that it will some day become one of the famous mines of Amador county.

CENTRAL EUREKA—The clean-up of this mine for last month exceeded that of any month's run theretofore made. It is reported that the aggregate was over $35,000, leaving a larger margin of profit than any previous month. The ore came mainly from the lowest level, the ledge being of large size, and has materially improved in quality. The prospects of this big dividend-payer have been greatly enhanced by the developments in the deeper levels.

BUNKER HILL—Everything is running smoothly, with as large a force of men as it is convenient for them to work. Union and non-union men alike are employed, and all speak in praise of their treatment by the company and its employes who hold responsible positions.

FREMONT-GOVER—The situation at this mine remains about the same as last week. Sixteen men are at work putting in the sand flume through the town. Manager Goodall is in San Francisco, and Superintendent Palmer is looking out for the property during his absence. No definite time has been set for starting up the mine, all statements to the contrary being simply rumors. The union men still have two day guards on duty, whose only work is to keep cool under the shade of some near-by tree, and draw their $3 per day from the union's treasury. The company has three men on duty of evenings, looking out for the plant. Everything is quiet, and no trouble is anticipated now or in the future.

Small Enterprises.

The importance of small enterprises to a town or community cannot be overestimated. On an average every man that secures employment provides for four persons. A machine shop that employs ten men is furnishing directly support to forty people, say nothing about those who receive benefits indirectly by furnishing supplies, etc. Quite recently a mining superintendent who is looking after a property with only a 10-stamp mill running, remarked that 75 persons were receiving support from the mine. Those of us who are engaged in other pursuits do not stop to think of the advantages to all that any new enterprise would be, but have a tendency to discourage rather than encourage the same. There is hardly a town in Amador county but what has water or electrical power sufficient to propel any class of machinery. A small foundry might be made to pay. A local-steam laundry would be well patronized, and many others that we might mention. The fault lies with the people. When asked our opinion on these matters we shake our wise heads and hoodoo the project at once. Capital must find investments, and it had just as well be placed in your town or county as in the neighboring one. The people of Ione united, and they now have their creamery, high school and railroad. Quite recently Carnegie agreed to donate $40,000 to a certain city for a public library. The people quarreled as to its location, and the offer was withdrawn. Seeing their mistake they united, selected a location, and received the donation. If your town is an ideal spot for any enterprise, no matter how small, begin to agitate the matter, keep it constantly before the people and some one will surely start it, and the entire community will be benefitted thereby.

Italian Picnic.

The 23d anniversary of the Italian Benevolent Society will be celebrated at Fullen's grove on Sunday next, June 5th, in a manner that promises to surpass any previous celebration held under the auspices of the society. An extensive and entertaining literary program has been prepared, excellent music has been secured for the dance both day and evening, and what promises to be one of the most interesting games of baseball for the largest purse ever before offered in this county will be interesting to all. Those who sympathize with fraternal organizations of this character should not fail to be present. The society forms in Sutter Creek, and marches in a body to the grounds.

The Delinquent List.

The delinquent tax list is published in this issue. It is a rather lengthy document, although not so formidable as the list published last year. Every township shows a decrease both in the number of delinquents and the sum total of the delinquency.

Were Joined in Wedlock.

Paul R. Beauchemin of Jackson and Miss Mary J. Mattley of Mattley Station, near Jackson, were united in marriage in the parlor of the Metropolitan hotel in San Andreas on Tuesday afternoon of this week, Justice P. H. Kean officiating. The groom is an exemplary young man well known to many of the people of this county, having been born and raised at West Point, where for many years his father was engaged in the business of trading and carrying on a general store. The bride is a well known young lady of the section in which she resided in Amador county, and is highly thought of by her friends. The young couple will make their home in Jackson, where Mr. Beauchemin has for some time resided.—Calaveras Citizen.

Settled With the State.

Treasurer Gritton, through W. F. & Co., made his semi-annual settlement with the state treasurer last week, by forwarding the sum of $873.73, the amount being the difference between the county taxes and payments received on school lands, and the state school fund and railroad taxes due the county. The balance generally comes this way, but owing to about $3000 received from the Standard Electric Company on school lands the balance was against the county.

Origin of the Aztecs.

An old tradition says the Aztecs were one of seven powerful tribes that emerged from seven caverns in a region called Aztlan, or place of the heron. They wandered away from their fellows after a great confusion of tongues and settled in the region they are known to have inhabited. This tradition may be partly fabulous, but it is sure that the Aztecs settled the country before the eleventh or twelfth century.

All the tribes lived in peace for a considerable time until the strong began to encroach upon the territory of the weaker. Then a fierce war for supremacy over the whole territory ensued and lasted many years. Under the leadership of their military chiefs the Aztecs obtained control of the whole territory and established a very enlightened form of government. This was consummated in 1324 or 1325.

Detecting Guilt In Liberia.

The brown skins of the natives in Liberia are often daubed with red and white clay, the effect of the latter being rather startling. This is called dressing. Sometimes a vertical blue mark is seen across the forehead. This is a sign of freedom. The Kroomen have it more than others. They are largely employed as extra hands on the steamers. When a man is suspected of murder, theft, etc., he is made to drink sasce wood. This being deadly poison, his innocence is declared by the draft not proving fatal. It is said, however, that this is only a form. When the fatal moment arrives some expedient is generally adopted, or else it is considered that only an innocent man would be willing to approach the deadly draft.

Weddings In Korea.

At a Korean marriage every one rides on horseback and in single file. First comes a manservant, who carries in both hands an imitation life sized wild goose, covered by a red scarf. Then come the bridegroom, his friends and all the servants he possesses or is able to borrow. At the bride's house the servant first deposits the goose on a bowl of rice; then all dismount, and, leaving outside their outer robes, their hats and their boots, they enter the house and make as much noise as they possibly can. The pandemonium does not cease till the guests are paid to go away. A feast follows and then the bridegroom is taken to his bride, whom he sees for the first time.

One Consolation.

Patient (feebly)—Doctor, do you think I shall survive the operation? Proud Physician—Well, sir, if you don't, you have the satisfaction of knowing that it cost nearly twice as much as any similar one performed in the city.—Smart Set.

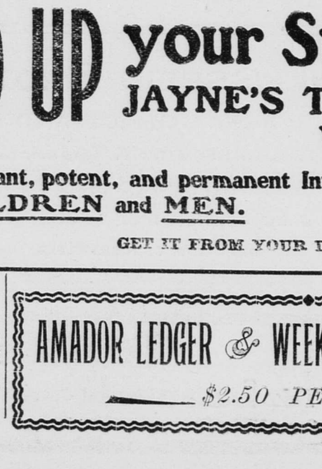

The Precise Moment.

Bessie—And when does a young man begin to think about marriage? Tom—About two months after marriage, as a rule.—Puck.

An Important Moment.

Mr. Newlywed (in the kitchen)—What are you cooking there, my dear? Mrs. Newlywed (excitedly)—Don't bother me now. There's the cookery book. I'm making recipe No. 187 on page 396.

It is a miserable state of mind to have few things to desire and many things to fear, and yet that commonly is the case of kings.—Bacon.

SAWYER'S EXCELSIOR

FISH FED BY HAND.

Many Specimens of the Finny Tribe Are Easily Tamed.

Experiments made in a large aquarium have proved that fish may be easily tamed and trained. This is particularly true of blue perch. They soon consent to taking their food—ulva, a green, lettucelike weed—from the hand, and do not at all object to being handled. A huge kelp cod, a splendid specimen of rich blue and green hues, that was kept in the same tank with the perch, readily learned to feed from the hand, and seemed to enjoy being scratched and rubbed.

Sea slugs, too—singular, shell-less things possessing the faculty of secreting a purple fluid which they throw out in self defense—took their regular meal of seaweed from their feeder's fingers without the slightest fear. Sticklebacks, perch, bass and catfish are among the most easily tamed fish, and the story is told of an old fisherman who day after day fed a large horse mackerel in the open sea with pieces of the fish he cleaned. It gradually got into the habit of coming nearer and nearer to where the boat was tethered until, finally convinced that it would not be harmed, it consented to take its daily meal directly from the fisherman's hand.

The Amount Requisite.

Cholly—How much money would a man have to have to marry you? She—Is it yourself you have in mind? He—Ye-es, I suppose so. She—All there is.—Smart Set.

Some Persian beauties decorate their faces by painting figures of animals and insects upon them.

INDIGESTION

"I was troubled with stomach trouble. Thedford's Black-Draught did me more good in one week than all the doctor's medicine I took in a year."—MRS. SARAH E. SHIRFIELD, Ellettsville, Ind.

Thedford's Black Draught quickly invigorates the action of the stomach and cures even chronic cases of indigestion. If you will take a small dose of Thedford's Black Draught occasionally you will keep your stomach and liver in perfect condition.

THEDFORD'S BLACK-DRAUGHT

More sickness is caused by constipation than by any other disease. Thedford's Black-Draught not only relieves constipation but cures diarrhœa and dysentery and keeps the bowels regular.

All druggists sell 25-cent packages.

"Thedford's Black-Draught is the best medicine to regulate the bowels I have ever used."—MRS. A. M. GRANT, Sneads Ferry, N. C.

and surrounding towns.

Address F. L. CREASON, IONE P. O.

PARAMOUNT is one of the handsomest horses in the state and his breeding is of the very best. Those who raise colts by this beautiful young horse can consider themselves fortunate. A tougher, more hardy, or better formed horse never lived. His sire "Old Altamont" was the greatest sire of extreme speed in his day, having seven in the 2:10 list. There are but two or three of his sons in the State, and Paramount out-classes them all in beauty and breeding. Paramount's dam, Nancy, by Engineer, son of the Great Electioneer, was a beautiful mare with extreme speed but never was raced.
